Github: https://github.com/Aniket-a14 Mobile: +91 8388010464

SKILLS

Languages:	C/C++, Python, JavaScript, TypeScript
Core:	Data Structures & Algorithm, OOPS, System Design, Computer Networks, Operating Systems
Development:	React, Next.js, Tailwind CSS, Node.js, Express.js, Fast API
Databases:	MySQL, MongoDB, Postgres SQL, Prisma ORM
Cloud & Devops:	Terraform, GitHub Actions, CI/CD Pipelines
Tools:	Git, Postman, Docker, Kubernetes
Soft Skills:	Team Collaboration, Problem-Solving, Versatility

WORK EXPERIENCE

Outlier AI | AI Trainer Sep' 24-Jan' 25

- Worked as an **AI Trainer** to improve model performance by handling **300+ diverse task types**, where I refined prompts and optimized outputs, resulting in higher **response accuracy** while gaining deep understanding of **LLM behavior and prompt engineering strategies**.
- **Reviewed** and **debugged** over 1000 AI-generated responses to ensure clarity and strict guideline compliance.
- Conducted **200+ peer evaluations** to maintain output quality and consistency across contributors, improving overall system reliability while developing strong **analytical thinking**, **quality assurance**, and **feedback-driven optimization** skills.

PROJECTS

SRA – Smart Requirements Analyzer | GitHub | Link Nov' 25

- Created an AI-powered requirements platform reducing documentation time by **70%, processing** 500K+ tokens across **50+ projects** with 95% user satisfaction
- Developed a full-stack LLM system auto-generating 6+ deliverables from plain text
- Achieved a 70-80% reduction in manual effort, with **40% higher accuracy** and 25-30% lower latency
- **Tech Stack:** Next.js 16, TypeScript, Node.js, Express, Prisma, PostgreSQL, Terraform, Docker

AI Friend | GitHub Oct' 25

- Designed a sophisticated, real-time voice-interactive AI agent by using a decentralized ecosystem of specialized **micro-agents** coordinated via a high-performance NATS event bus
- Optimized Sovereign Mesh that achieves **sub-300ms response** times through native multimodal intelligence
- Integrated 11 containerized micro-agents for STT, vision, reasoning, and voice processing
- **Tech Stack:** TypeScript, Python, Tailwind CSS, Postgres, NATS JetStream, Wispher, GPT-SoVITS, Docker

Wizard-w1 – AI Data Analyst | GitHub May' 25

- Engineered a dual-brain monolithic agent achieving **500% faster autonomous data analysis**
- Implemented a Next.js 16 and Fast API stack with **sub-200ms latency** for EDA on 10k+ row datasets
- Constructed a 4-bit quantized engine, eliminating 100% cloud costs and running natively on 8GB RAM
- **Tech Stack:** Python, Fast API, Next.js 16, Ollama, Docker

CERTIFICATIONS

- Social Networks | *NPTEL* Nov' 25
  Studied **graph theory**, **network analysis**, and **information diffusion models**, enabling deeper understanding of **information flow**, **system interactions**, and **data relationships** in large-scale systems

ACHIEVEMENTS

- Recognized open-source contributor, publishing reusable components on **GitHub** and within the **Coder Legion** community to support collaborative learning and developer growth. Nov'25-Present
- Solved 1100+ algorithmic problems across **LeetCode**, **Hacker Rank**, **Code Chef**, **Code forces**, and **GeeksforGeeks**, showcasing algorithmic thinking and strong data structures knowledge. Dec'24-Present

EDUCATION

Lovely Professional University Phagwara, Punjab
Bachelor of Technology Aug' 23 – Present
Computer Science and Engineering; CGPA: 7.58

Indira Gandhi Memorial High School Barasat, West Bengal
Intermediate Mar' 22 – May' 23
PCM; PCT: 75%
